

Amadeus Pricing Options

FXA = Lowest available pricing option without rebook and does not store the fare

FXB = Lowest available pricing option with storing the fare in the PNR (same as FXA but also rebook in the class suggested plus store the fare automatically)

FXC = Value pricing option – this will search and give you a number of available fare recommendation. *Ex. FXC YYZ / D20JUN / YVR / D27JUN / LAX / D02JUL / YYZ*

FXL = Lowest pricing option regardless of availability

FXX = Price the PNR in the class that was book without storing the fare in the PNR

FXP = Price the PNR in the class that was book and store the fare automatically (same as FXX accept it will store the fare in the PNR)

If the result on screen does not show breakdown of the fare and taxes, type in **FQQ01** or **FQQ02** to see the breakdown
